Not quite home

Still not quite at home, the WUTM carrier current radio station went on the air Friday evening in the SGA office annex.

Walker radio station worker is shown manning the controls. The station is currently operating on dial position 760.

WUTM begins operation from temporary facilities

By JERALD OGG,
Pacer News Editor

The WUTM carrier current radio station, although still not in the new station facility, began operation last Friday in the SGA office annex.

The new facility, which was expected to be completed by the beginning of this quarter, has been held up because of design problems with the air conditioning system, according to station manager Rick Swiers.

"The original heating system design by Knoxville was very expensive, and with existing funds we asked them to redesign it," Swiers explained. "To my understanding Dr. Trentham has asked them to complete the plan by the end of the week."

The station is currently on the air from 6:55 to 1 a.m. each weekday and 9:55 to 1 a.m. weekends. Its dial position is 760 and it can be picked up only in the dorms.

"Basically, the dial position of the station is 760," Swiers explained. "It may vary from dorm to dorm, but it should be somewhere around 760."

The temporary setup has caused some problems, according to Swiers, but none that cannot be solved.

"We have a lot of problems," Swiers admitted. "We have too many persons who come in the station, our equipment is not set up in a permanent manner, and the announcer has very little ease in working. We have had to slap it together the best we could."

"Basically, though, it is just a problem of disorganization," he continued. "We just don't have a place to call home. It is in convening us, but I don't feel we are any less effective on the air."

The response to the station by students has been good, Swiers said, but more interest is expected as more students become aware of the station.

"We have had good

response, but many of the students just don't know what the situation is," Swiers said. "Some are looking for us on FM and some think that we're still not on the air."

"It is coming along quicker than other quarters have at

the beginning, though," he continued. "We have had more requests for songs."

There has been some problems in reception in some of the dorms, but Swiers said they should be worked out.

Survey demonstrates lack of student-faculty dialogue

By DAVID BYRN
Pacer Features Editor

While opportunities for frequent interchange between faculty and students have often been considered a top selling point of UTM, a recent survey indicates that most UTM students seldom visit instructors for reasons other than tests or grades.

A survey conducted by The Pacer showed that 79 per cent of the respondents do not visit instructors more than three times per quarter (22 per cent not at all). This does not include instructors when acting in an advising capacity and excludes grade related cases.

Provost Jimmy Trentham said he felt the opportunities are there, but the students don't take advantage of them.

"It is a problem," Trentham said. "I've recognized it for a good while and it is a concern. I believe it is the attitude of the student. They are often afraid not of the teacher

himself, but of the formality of the classroom or the situation.

"Certain teachers motivate students to see them," Trentham continued. "Other teachers just don't have that type of personality although they are no less willing to talk to them. I just don't believe there are that many teachers who aren't available to students."

The survey also asked the students to select the most important qualifications for a teacher, the main reason they are in college, the thing they like best about college life, the main reason they chose to attend UTM and to rate the teacher's evaluation process.

The main reasons UTM students are in college appear to be to prepare for a career (65 per cent) or for graduate or professional area schools (22 per cent) according to the survey results. Some said they mainly wanted to get a degree and get out (4 per cent) came because their parents wanted

them to do so (3 per cent), or simply want to learn and grow (4 per cent).

One student put it this way, "I came to get a practical education as well as to learn about life in general."

Another commented, "I really didn't know what I wanted to do so I came to college instead of sitting around."

The thing most of them like best about college life is associating with friends and acquaintances (65 per cent). In this category, the relative independence of college life and studies each were ranked highest by only 9 per cent of the students, while athletics and relationships with the opposite sex each were rated highest by only four per cent.

The main reasons many students chose to attend UTM were convenience (26 per cent) and its reputation for quality education (26 per cent).

A freshman said, "I came to UTM because of its reputation for excellent preparation for medical school."

For others, the main lure was the attractiveness of the UTM campus (10 per cent) expenses compared to other schools (9 per cent), course offerings (6 per cent) and the availability of financial aid (4 per cent).

One third of the respondents felt the teacher's evaluation system was valuable, while 15 per cent considered it of not much value. Forty per cent were uncertain as to its merit. Otherwise, six per cent thought it was extremely valuable while another 6 per cent considered it a waste of time.

The Pacer surveyed a standing random sample of 100 dorm students stratified proportionately in relation to the race, classification, and sex of the undergraduate population. With a respectable 68 per cent return, the survey was weighted slightly toward lower-classmen because they responded at a higher rate than upperclassmen and are 63 per cent of the undergraduate population as well.

\$1400 gain realized in Manilow concert

By KAREN FRANKLIN
Pacer Asst. News Editor

SGA and the Inter Hall Council netted a total profit of \$1402.37 after a very large turnout for the Barry Manilow Concert Tuesday night.

"We were very pleased with the turnout," IHC Vice President Steve Cox said. "I think it was one of the best shows UTM has had."

The crowd responded more enthusiastically than any other one I've seen at UTM," Keith Franklin, SGA secretary of communications, said. "We originally hoped to sell more tickets, but due to the number of Barry Manilow appearances in the area, we were very pleased with the turnout."

Franklin said approximately 2500 tickets were sold. The profit from the

concert will be split equally by IHC and SGA, he added.

Franklin said it was a near certainty SGA will have a major concert May 16.

"Styx has confirmed they will play at UTM May 16," Franklin said. "Either Barefoot Jerry or Freddie King can be booked as a backup act."

The three act concert may also include The Nitty Gritty Dirt Band or Poco. Franklin said, "Jerry Caruso can be thanked for booking an excellent series of movies." Franklin said, "We hope to attract an audience from the community as well as the campus. If profit is made from the movies it could be used for free dances or other low cost

Elections slated Tuesday as three vie for presidency

By PATTE ELMORE
Pacer Copy Editor

Characterized by extensive campaign reforms, this year's SGA officer elections scheduled for Tuesday show three candidates running for president.

Presidential candidates include Steve Cox, Keith Franklin and Lee Nethery. David Armstrong and Russ Stoddard are running for vice president. David F. Macdonald and Debra Ann Morton, secretary of affairs while Russell K. Day, Brenda Gail Rankin and William Bryan Roehrig III are vying for the secretary of finance position.

In two uncontested races, Bill Nance has petitioned for secretary of communications while Gerry White is running for secretary of minority affairs.

The campaign has been running rather smoothly, according to Elaine Mitchell, election committee chairman. "For the most part, the candidates are following the new rules," Mitchell said. "There were so many limitations introduced at one time - as many as the candidates could handle."

One of the major changes is the implementation of voting precincts in each of the residence halls, Mitchell pointed out. Students living in the dorms may vote in their hall lobbies by presenting

their ID. In the past, all voting has been done in the University Center.

The head residents are being asked to supply an accurate list of those living in their halls. Mitchell said, "We will check their list against the master list. The ballot boxes will remain in the dorms on the voting dates until 5 p.m."

Students living off-campus

will be able to vote in the University Center.

Another change in the campaign procedure was the placing of limitations on the amount of money that a candidate could spend on his campaign and the places where he could display posters.

Mitchell said, "We will check their list against the master list. The ballot boxes will remain in the dorms on the voting dates until 5 p.m."

According to the SGA Constitution, presidential candidates may not spend in

excess of \$400 on their campaign. The vice presidential candidates are limited to \$300 and the secretaries to \$200.

I think the changes made are good, almost a necessity. You would find a student who would spend enormous amounts. I hate to see someone win a campaign because of the number of signs

he puts up, not his qualifications.

The new rules also state that campaign posters used on campus except in dormitory rooms or in automobiles shall not exceed 20 by 36 inches in size and places a limit on the number of banners allowed. Provisions were also made stating that campaign posters may be placed only on

(See page 6, col. 7)

Small profit to be netted by campus food services

By JERALD OGG
Pacer News Editor

Food services, though forced to undertake many of the cost-cutting procedures of other university departments,

will probably realize two to three per cent profits this year, according to director David Brodrick.

Food services includes the cafeteria, the UT Bone, the UT Cone and the Pacer Pantry. According to Brodrick, all but the UT Cone is making money.

"One goal this year was to break even," Brodrick explained. "We lost money the past three years, and we were told that we needed to at least break even this year. Our aim now is to make two to three per cent in the total food services picture."

"One area that is really helping is the UT Bone," he continued. "It lost money last year, but this year the volume is such that they are showing a profit. With the Pacer Pantry

and the cafeteria making money, our only non-profit area is the UT Cone."

The cafeteria does not pay any rent to the University Center for the use of its space, Brodrick said, but any profit

is used for food services.

Brodrick outlined many economy measures that food services has taken to battle inflation, the primary one of which is the hiring of a

possible price. She is able to spend more time on it than I was able to before."

Another money-saving step for food services has been its personnel replacement policy.

"One area we have been able to reduce is our labor," Brodrick said. "If someone quits, we are not replacing them except maybe with student help. We've had three persons quit in the past four weeks, and we are going to replace only one."

Cost cutting measures for customers have been taken in the cafeteria, according to Brodrick.

"We now have, as most people know, a budget food line as well as the regular line," Brodrick said. "The prices on this line are lower and we feel that this has helped the customers."

We have also purchased a

(See page 5, col. 4)

Dollar dilemma
Sixth in a series

that is netted goes toward the operation of the University Center.

"We aren't paying for this space, and if we can make a profit this sort of pays the rent," Brodrick states. "I am pleased with the overall

procurement clerk.

"We have hired Miss Vicki Exum as a procurement clerk in order to help us in our buying power," he said. "It is a new position, and we feel that it has helped in bidding and getting food for the lowest

First college concert

No sad songs for Barry

By PATTE ELMORE
Pacer Copy Editor

Backed by an escalating career of music arranging, accompanying other artists and some concert training, Barry Manilow played his first college date before an enthusiastic UTM audience Tuesday night.

"I really freaked out," Manilow said after the concert. "I had no idea it would be like this. I walk out and there's all these people. If this is what it's like, I'm coming back. It's great."

In his mile a minute speaking manner, a very tired Manilow commented on his career, his brief work with Hal David and other elements of the Manilow mystique.

"I'm getting used to the travel," he said. "This group is like a family."

Despite her stage aloofness and Cher-like dark "lady" quality, Reparata insisted she was not trying to project a mystic quality. One of her partners disagreed.

"She's psychic," Byrd said. "She's a Pisces you see and they're very mysterious."

"She's the one that's psychic," Reparata retorted.

She talks to herself on the subway.

They laughed, kidded and were friends. The women have been with Manilow since October.

Packing finished, the exhausted Manilow barely paused to answer a last question.

"Future plans?" he managed to smile. "I'm going to bed."

Barry Manilow

THE PACER / Outlook

Apathy, needed reforms included in campaigns

As campaigning begins this year for SGA elections, one can see some unpleasant reminders of past elections as well as a few changes that could prove to be very beneficial. Of course, there is naturally the ever present touch of apathy, exemplified by the fact that two of the races, those of secretary of communications and secretary of minority affairs, are not even contested. This is unfortunate for the candidate and especially the students.

With the advantage of knowing they will win without even campaigning the unopposed candidate does not have to discuss issues present his views and of course he does not have the same opportunity to feel the pulse of the constituency as other candidates. At the

Trustee race merits thought

In addition to the regular SGA elections Tuesday, UTM students will also elect a student to the UT Board of Trustees.

All the positions are important but the trustee position is especially significant since the winner will not only be representing UTM but all the students in the UT System. That includes five major campuses across the state and approximately 45,000 students.

This race deserves special consideration. Students should meet the candidates, study their qualifications and decide who will be the students' voice.

Cooperative efforts needed to ease book price crunch

Every quarter about this time students become concerned about the high costs of books. Unfortunately, most of the concern lasts only a few days and nothing is ever done.

The perpetual problem has escaped a solution, not because there isn't one, but because strong efforts have not been made to correct the situation. The blame does not belong on any one person or group, but instead must be borne by nearly everyone.

First, the obvious place to look is the bookstore itself. It receives a great deal of criticism, some of it warranted and some is not. It is doubtful there is a plot to rob students of all their money through high book prices or there is a conspiracy between the bookstore and the faculty.

However, it does seem that profits are often higher than necessary and careful study would probably reveal ways to cut back operating expenses. The entire University is cutting corners because of decreases in funding. The bookstore should do the same with the hope of more reasonable prices.

One must question the large percentage of profit made on used books. They are bought back at 50 per cent of original costs and then sold for 75 per cent. Why is this large mark up necessary? Whatever happened to the concept of the bookstore as a student service?

Often the culprit is not the bookstore though but the instructor. There are numerous instructors on campus that ask students to buy books that aren't really needed for the course. If an instructor is not going to refer to the book or ask questions from it, a student should not be made to pay the outlandish prices.

Another problem results when instructors change books quarterly. The student is left with a discontinued book that can't even be resold at

same time, the student is left without a choice. Two important positions are decided before the polls even open.

While the uncontested races are definite minuses the elections this year have a number of pluses—some things that have never been tried before.

First there are some campaign regulations that should make this a much more bearable election. The new election by-laws call for limited spending of \$400 for president, \$350 for vice president and \$200 for the other positions. This may still be too high for a campus election, but it is at least a start.

One of the most refreshing changes is the restriction on campaign posters. They can be placed only on glass surfaces and bulletin boards and are not to exceed a certain size. Students are still faced with a barrage of names, faces, tape and paper, but it seems to be some better than in the past.

Probably the biggest improvement for elections seen in years is the establishment of voting precincts in the residence halls. Since so many students have been unwilling to go to the polls and vote, elections officials have decided to take the polls to the students. It is pathetic that such a small percentage of students have been willing to go to the University Center in the past and vote.

Now besides the Center, there are six new polling places. If voting is still low this year, poll will have to assume most students are not concerned with representation of their views.

Most people have been led to believe the typical college student cares about rights and representation. Is that really true or is it just a myth? When the votes are counted, the answer should become clear.

Children gain in APhiO Push

half price. In short, the instructor could really help students if they would just be a little more considerate.

Last, but certainly not least, are the students. They should not be overlooked, since they too must share the blame. SGA has done virtually nothing toward alleviating the problem. The Alpha Phi Omega Book Exchange, with infrequent hours and hardly any selection of books, has not been successful. Students have not shown enough concern to either support the Book Exchange or push for something new.

Although there are a number of possibilities, one obvious plan would be for SGA to set up its own program with adequate financing to be able to buy back books and then resell them. With a new administration coming in, this should be considered when marking the ballots. There has been little talk about this problem so far in the campaign, but it's not too late to start.

Tennesssean Collegiate Press Association

Each year people marvel at the amount of money Alpha Phi Omega service fraternity raises for St. Jude Children's Research Hospital. Yet each year, they somehow manage to raise more money than the year before.

Over the past five years, the "Push For St. Jude" has raised more than \$90,000 for the hospital. The fraternity has reason to be proud of this accomplishment more than that. The University can be proud to be represented by the group.

Dylan's 'Tracks'

"corrupt ways" have been her blind.

But "Idiot Wind" is about any particular idiot. It's about the frigid idiot wind that blows through our lives. It's the song of one who has freed himself from the shackles of world that chooses to do good and maintain evil. It's an angry belligerent condemnation of all the unfriendly ignoramus (who would know love if it farted in their faces) "from the Grand Coulee Dam to the Capital."

The long narrative, "Lily, Rosemary and the Jack of Hearts," is an interesting intricate tale of the Old West, which dips and curves and surprises with only selective glimpses of the plot.

With only this selective view to go by, the listener is forced to fill in the spaces with his own ideas about what happened.

The pain becomes unbearable and almost suicidal in "Shelter from the Storm." Here Dylan recalls a time when he was saved from despair by a lady who gave herself freely and without question. She was an angel who "walked up to me so gracefully and took my crown of thorns."

As always the complications of such a relationship become oppressive as the relationship gets older and Dylan once again loses. But unlike "Idiot Wind," Dylan understands that his confusion ruined this relationship. He is, by nature, however, too cynical a person to let it go at that.

In the end he asserts that he sacrificed his peace of mind for her freedom. The song is a tour de force. It comfortably and functionally ties loving memories to sarcastic innuendo.

As the album ends, a smirk comes over Dylan's face. He knows pain all too well and he knows the depression of being exposed to so much pain at once, so he finally confides "Life is sad, Life is a bust, all you can do is do what you must," Dylan does what he can and does it well.

Dylan has never been more sure of himself as a performer. His vocals are strong and much more expressive than some of his previous efforts.

"Blood on the Tracks" is an important, mature work and should be recognized as such. It has become fashionable to give Bob Dylan a hard time. But those who follow fashion have never really bothered Dylan.

"Just because you like my stuff doesn't mean I owe you anything."

Nashville news

by CHARLOTTE CROWDER

Legislative antagonism seen

Tennessee Collegiate Press Association

Nashville -- Antagonism between higher education and the legislature seems to involve more people and have more severe implications this year than in the past.

In recent years, legislators have tried to regulate the morals of college students by proposing laws to ban co-educational dormitories, and they have tried to set curricula by requiring nine hours of American History before a diploma can be granted.

This year, though, the antagonism shows itself in the budget, where it hurts the students, the administrators, the faculty and every employee of the state's colleges and universities.

Gov. Ray Blanton's budget proposal, if approved, would provide a legislative appropriation increase of more than \$7 million for vocational education and only a \$1.5 million increase for higher education.

Those figures show the Blanton administration's increased emphasis on vocational training, but they don't fully explain the politics behind the small higher education increase.

Even before the budget was drafted, Blanton tightened the reins on the Board of Trustees and Board of Regents in his role as chairman of each board. He has shown them they can expect his active participation in their activities throughout his term.

When Blanton met with Dr. Edward J. Boling, president of the UT system, and Dr. Roy Nicks, chancellor of the Regents system, to discuss their budget, sources say

things got a little hot.

Nicks and Boling said they were willing to cut as much as any other state department, but no more. Blanton reportedly told them not to expect much, and not to "go crying" to the legislature for more.

Improvement of vocational training is a positive step, but not at the expense of programs and services offered by higher education institutions.

Boling told the Senate committee he was told not to limit enrollments and not to

raise tuition more than 10 per cent. Yet he was given operating funds which leave him few alternatives.

The capital outlay projects recommended by Blanton also seem to have political motivation. Many projects needing relatively few dollars for completion were postponed, while a new project—the veterinary medicine school at UT-Knoxville—was fully funded.

Boling told the House committee that project had always been handled in a different manner from the others he requested and was "set off to the side" in priority listings. He reiterated to them his priorities and said that while the vet school was certainly among them there might be other areas of equal or greater need.

Both were in a position to tell the committee exactly what they thought of the budget without fear of personal reprisals, but they remained calm and rationally answered what must have seemed to them foolish alternatives.

Folger and THEC's acknowledgement "budget wizard," Jack Blanton, are both resigning, partly because of their disappointment with the budget and an inability to work with the Blanton administration.

Both were in a position to tell the committee exactly what they thought of the budget without fear of personal reprisals, but they remained calm and rationally answered what must have seemed to them foolish alternatives.

Those figures show the Blanton administration's increased emphasis on vocational training, but they don't fully explain the politics behind the small higher education increase.

Many, in fact most, of the legislators are well-educated themselves, and most attended Tennessee colleges. They could be the best examples of people using their knowledge to accomplish long-range, meaningful goals for the overall betterment of the state. However, many seem to have lost sight of the process which helped get them where they are.

Improving the quality of life for all Tennesseans has been a stated goal of both the Blanton administration and the General Assembly. That means providing high quality education to all citizens of the state.

Improvement of vocational training is a positive step, but not at the expense of programs and services offered by higher education institutions.

Boling told the Senate committee he was told not to limit enrollments and not to

Turtle talk

Elections deserve student support

Once again it is that time of the year. SGA elections

The election is to be held on Thursday. From what I understand, this year there are to be voting boxes in each dorm lobby. This should increase the percentage of voters. It will be very convenient to stop by and vote on your way to class.

I ran for an office in the fall elections. What I learned through that experience is what I want to express to you. It was hard work running a campaign, but fun too. Anybody that attempts to win an election has to give up a lot of time and money.

These people deserve, at least, to be noticed for their efforts. Most of all, the people should obtain five minutes of your time. It takes less than that to vote.

In the real world, would you not vote for the President? If you wouldn't, move to a country where this honor is not given to you. To vote is an honor.

The UT System does not have to give us a SGA. They could be dictatorial and deprive us of any say at all.

Many may think SGA accomplishes nothing; I challenge you to imagine this campus without SGA.

Not only is voting an honor, but it gives you the right to complain. I sit and listen to many who are upset with the way things are run. First, I ask if they voted—if not, I wonder why they are complaining. If you don't like

the way things are and want to complain, VOTE.

I agree, one vote is not much—just like one penny isn't much. On the "Push for St. Jude" this year every brother gave a penny wasn't much, but a lot of pennies make a lot of money—\$27,500.

The same is with votes: each and every vote is very important. In the two years that I have been here, I have noticed that most of the offices are held by Greeks. There is nothing wrong with that; I take my hat off to them. They get their people in, but you know the independents can do the same if they will wake-up and vote!

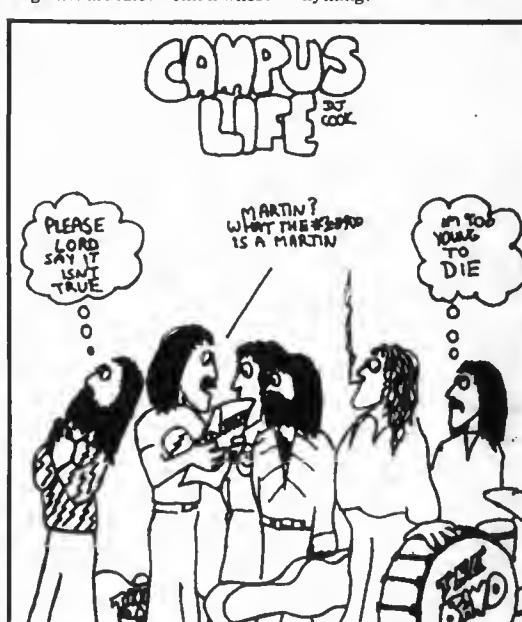

In my election, I ran for sophomore class president. There were four nominees. I won the election by ten votes

but lost the run-off. In the run-off, I didn't even get all my first votes.

Maybe I lost them honest, but from talking with people, many didn't know of a run-off. People, there is a run-off election on Thursday. Please go vote again.

I wish I knew why people won't vote; I don't understand. If you don't like any of the nominees, write in a candidate. I have felt that the publicity of these elections has been pretty good in the past, but this time I promise this election will get publicized.

Please read "The Pacer," look for signs, talk and go vote. I am not running for an office, but I am running a campaign. A campaign to go VOTE.

by JOHNNY HARRISON

Dance group's concert scheduled for next week

The UTM Dance Group's Spring Concert will be at 8 p.m. next Wednesday and Thursday in the Fine Arts Auditorium.

This year's concert has more depth than last year's, according to Carolyn Byrum, group advisor.

"The program is also more flexible," she said. "It has more variety, ranging from the current mathematical dance structure to the more romantic structure."

Three of the dances will be done to live music with Gilbert Carp playing the saxophone, Rela Carp the piano and Barbara Jones singing. The music to two of the compositions was written by Carp, an associate professor of music at UTM, to accompany two poems written by Byrum.

Live music adds a great deal to a performance both for the spectators and the dancers, Byrum said. She also felt the group is very lucky to have a composer who is both able and willing to compose for dance.

The dances themselves, while all in the modern idiom, are a mixture—some very serious, some funny or joyous, some hard to define emotionally. Two of the dances are done in unison, Byrum, said, which has not been done before at a concert here.

One dance, using determinate movements, which is one set movement followed by an improvised movement, never

turns out the same way twice.

"You never know if it will be serious or playful," Byrum said.

One very different dance, "Tharpists," is based on the choreographic structure used by dancer Twyla Tharp.

"We found twelve to fourteen movements, then every dancer wrote these down in a different order. The movements were then numbered—a certain lunge is '3,' a turn is '8'—and at one point the numbers are called out as a signal for all the

dancers do that movement," Byrum said. The dance starts out in unison, but soon each dancer does his own sequence. The movements can also be sped up or slowed down.

"Structurally, it's the most complex dance we do," Byrum said.

One of the dances, "Trio," was also recently performed at a UTM basketball game halftime. Also one of the dances was choreographed by a student in the group, Erma Seaton.

Admission is \$1.

Theatre to feature Nash's 'Rainmaker'

By LINDA HOOOPER

Pacer Staff Writer

The second annual dinner theatre will be presented April 29, 30 and May 1 featuring N. Richard Nash's play "The Rainmaker."

The play, sponsored by Vanguard Theatre, Women's Activities and the University Center, is set in the 1920's and deals with "the efforts of a plain girl's father and brothers to find her a husband."

"Last year's response to 'Bus Stop' was wonderful," Billie Ann Pace, director of women's activities, said. "Last year we did have some trouble with the sound system,

but this year the University has installed completely new systems."

This year's dinner will be a smorgasbord buffet open from 6:00-7:15 each evening, Pace said. The play will begin when everyone is finished eating.

"There will be a special student rate for all three nights of the performance," Pace said. "Students will be able to buy two tickets for \$4 each while regular sell for \$5."

Tickets for the play can be obtained at the University Center Information Desk starting Monday. Students must present their ID when buying tickets.

The cast includes Leon Scioscia, Bob LaVelle, Bryan Nichols, Pat Anderson, Lynn Black, Jim Brewitt and Tony Isbell. William Snyder is director.

Chemistry talk set

Dr. T. H. Crawford, chairman of the University of Louisville chemistry department, will speak on "Population: A Case of Too Many Using Too Much" at 8 p.m. Wednesday in the Humanities Auditorium.

Crawford's visit is being sponsored by the UTM chapter of the Student Affiliates of the American Chemical Society and the Kentucky Lake section of the ACS.

"We just made that decision to do that," Allison said. "Initially these became tickets of admission to a class. Now class rolls are out about the day after registration."

"Why Isn't Alpha Phi Omega's book exchange open on a regularly scheduled basis?"

The main reason for this quarter's problems have been a lack of manpower and a shortage of books, according to A Phi O member Roger Redding.

"This question came up in our meeting, and one of the problems has been a new person in charge," Redding said. "Because of our 'Push for St. Jude,' we weren't able to open it up as early as usual."

"We have also had a shortage of manpower and books," he continued. "It has just been a combination of things."

Why is the cafeteria not putting tomatoes in salads this year and why is the sandwich line often out of tomatoes?

The cost of tomatoes as well as supply problems are the primary reasons for these two situations, Brodrick said.

"Sometimes it is a case of our not getting it from the supplier," Brodrick explained. "Cost also has a bearing, and I'm sure that we have run out many times

because of mistakes on our part."

Why aren't green registration cards done away with and save some money?

This practice is going to be done away with in the future, according to Henry C. Allison, director of food services.

"We have considered and are still considering using charge cards at the UT Cone," Brodrick said. "One of the main reasons there is the \$3500 to \$4000 cost of a new cash register."

"As for the Pacer Pantry, we just don't want to get into charging," he said. "The bookkeeping for our charge system now runs around \$20,000 per year, so we are not too eager to add to it."

Why is the cafeteria not putting tomatoes in salads this year and why is the sandwich line often out of tomatoes?

The cost of tomatoes as well as supply problems are the primary reasons for these two situations, Brodrick said.

"Sometimes it is a case of our not getting it from the supplier," Brodrick explained. "Cost also has a bearing, and I'm sure that we have run out many times

because of mistakes on our part."

Why aren't green registration cards done away with and save some money?

Why isn't Alpha Phi Omega's book exchange open on a regularly scheduled basis?

The main reason for this quarter's problems have been a lack of manpower and a shortage of books, according to A Phi O member Roger Redding.

"Our program was called the Day of the Young Child," Norman said.

"We had people here from all over this area," Norman said, "I think it was a very successful day. All sessions were overflowing."

Registration for the day began at 9 a.m. and was followed by guided tours of the

UTM Nursery School, the UTM Kindergarten and the Happy House Day Care Center.

Other activities presented during the day included two lectures and a series of workshops.

"This is going to be a national occasion for at least three more years," Norman said. "We plan another program next year after this year's being so successful."

Enrollment hits high

Enrollment for Spring Quarter rose to an all time Spring Quarter high of 4496 with more expected to join the figures through late off

campus registration. According to officials, the process went smoother with fewer drops and adds.

Spring Quarter figures on enrollment set record

By FRED MAXWELL
Pacer Staff Writer

Enrollment for Spring Quarter has already exceeded that of last year and is the highest ever for any Spring Quarter, according to Henry C. Allison, dean of admissions and records.

Figures released Wednesday show that a total of 4496 students have registered for classes either on-campus or at off-campus centers. Registration for Spring Quarter last year was 4477.

Poetry recitation scheduled Monday

Margaret Danner, poet-in-residence at Lemoyne-Owens College, will present a recitation of her own work at 7:30 p.m. Monday in the Humanities Auditorium.

An award-winning Black writer, Danner has traveled throughout the United States, Europe and Africa on lecture tours, said Dr. Emil Roy, chairman of the English department. Danner and poet Langston Hughes combined to create one of the first "protest poetry" records of the early 1960's.

Memphis Southmen football player and poet Richard Thornton will speak at 7:30 p.m. on April 28 in the Humanities Auditorium. Roy said Thornton has written more than 100 poems primarily dealing with his

"We are very pleased with these figures," Allison said. "I think we'll go over 4500 with additional off-campus registration, and it is the highest enrollment ever for a Spring Quarter."

Allison admitted that economics played a part in the enrollment picture, but said that he thought off-campus registration would be up.

"We haven't analyzed it section by section yet, but it is my understanding that off-

campus registration is up," Allison said. "Students at off-campus areas often drag their heels about registering, so we'll probably have a few more."

The registration process went very well, according to Allison, with fewer problems than normal.

"We were pleased with registration this quarter," Allison stated. "We had fewer drops and adds, which tells us that students were somewhat more successful. The basic mechanical flow of students was better, also."

Manilow talent rated high

By DARYL CAMPBELL
Pacer Staff Writer

Once again Rudolph the Red Nosed Skeptic packed it in and went reluctantly to UTM concert time.

"What the Hell" I reasoned, "can Barry Manilow do without strings and brass?" Well I found out and then some Superlatives can become very boring after a time so I will try to keep a tight rein on my enthusiasm.

Beginning the concert with the hit single, "It's a Miracle," Barry (How can you help calling a person by his first name when he is so sincere) and his group whipped themselves and the ecstatic audience into a frenzy never before felt at a UTM

concert (not even at Charlie Daniels and the frenzy then was considerable).

The group was as tight as they could conceivably have been and they minced nothing in the show. The three neat ladies who accompanied Mr. Manilow were fantastically endowed with talent and other unconcealed assets (In fact, as Groucho might say, they had some of the nicest assets I've seen in quite a while)

Manilow displayed his versatility and vast range of writing ability by performing not only his biggies like "Mandy" and his more countless commercial credits but also his numerous softer and more thoughtful songs.

One of his early songs which did not receive very much critical acclaim or publicity

drove the crowd and Yours Truly bananas. Based on a prelude by Chopin, "Could It Be Magic?" is a delicate and shimmering work which starts softly and simply builds

was called back, they put out just a little more (always the sign of a good performer) by doing their "Martha Reeves" bit.

The incredible thing about

Concert review

to a moving and powerful end.

Manilow, dressed entirely in white, strutted up and down the stage, exchanging wisecracks with the audience and never trying to conceal his joy with the substantial crowd, gave 200 per cent of himself.

At the end of the concert, when Manilow and the group

quality to beautiful, poignant love songs (or more appropriately love-lost songs). After being called back for encores and after making his apologies, Manilow left a much happier and wiser UTM Wiser because maybe now we clods will recognize that the SGA is really trying to book some fine acts. Happier, because the man gave all he had and was genuinely grateful for the applause which he and his group deserved.

There's no doubt in my mind that the hopping, cheerful, dynamic personality of Barry Manilow will not be soon forgotten on this campus. Thanks you guys in the SGA for booking a dynamic performer. And thanks Barry for giving us something to remember.

We invite our researchers to ask more questions than they can answer.

Making your mark in business used to mean carving a comfortable niche for yourself and staying there. Promotion was simply a matter of time, provided you could spend 20 years in the process. But, today, business depends on technology. Technology that can't wait a moment if it's going to keep pace with what's happening.

That's why, at Kodak, our basic reliance on scientific research makes the need for creative young minds more demanding than ever. We must have people with drive and ambition, impatient to put what they've learned into practice. People who get all the freedom and responsibility they can handle, and tackle our problems with their ideas.

Which, we're happy to say, has helped many of our scientists yield important discoveries. For example:

The woman on the left has devised new and improved photographic materials for specialized scientific applications in fields such as astronomy and holography. The young man is an expert on surface analysis. His work in photoelectron spectroscopy

helps to identify unknown substances. The woman on the right has a dual background in gas chromatography and trace metal analysis, which she's applied to analyzing pollution in rivers and streams.

They came up with new problems while solving some of our old ones. But they've uncovered some promising answers, too. As they continue their research, you may read about them again. The oldest is just over 30.

Why do we give young men and women so much room to test their ideas? Because good ideas often lead to better products. Which are good for business. And we're in business to make a profit. But in furthering our own business interests, we also further society's interests. Which makes good sense.

After all, our business depends on society. So we care what happens to it.

More than a business.

Fifty per cent reinstated

Dismissals appealed

By PATT ELMORE
Pacer Copy Editor

Approximately 50 per cent of those students appealing for readmission after academic dismissal were reinstated for Spring Quarter.

"About 50 students appealed to the Committee on Admissions and Readmissions April 2," Henry Allison, dean

of admissions and records, said "Probably 50 per cent of those students appealing were reinstated."

According to Allison, 401 students failed to meet the minimum academic requirements during Winter Quarter.

"This was a little less than usual," Allison said. "Nor-

mally we run around 500 students."

Under the academic regulation program at UTM, an academic deficiency classification is intended to warn students of inadequate academic performance. A student is classified as academically deficient when his or her cumulative quality points earned are less than twice the cumulative hours attempted--when the cumulative GPA of 2.00 is equivalent to a cumulative GPA of 2.00.

Students placed on probation must attempt to remove the probationary status during the next quarter enrolled by attempting not more than 15 quarter hours of credit, to include both new and repeated courses. If the student fails to remove the probationary status, he receives an academic suspension. Allison said. Only students on probation can be suspended.

To be readmitted to the University after suspension, students must make a personal appeal before the Committee on Admissions and Readmissions, Allison said.

The committee usually consists of about six members

-0.44 9 hours attempted--when the cumulative quality points earned are 20 or more quality points less than twice the cumulative hours attempted.

-45-59.9 hours attempted--15 or more quality points less
-60-74.9 hours attempted--10 or more quality points less
-75-89.9 hours attempted--five or more quality points less
-90 or more hours at-

tempted--when the cumulative quality points earned are less than twice the cumulative hours attempted--when the cumulative GPA of 2.00 is equivalent to a cumulative GPA of 2.00.

Allison said he feels the committee is doing a good job.

"They're fair, interested in the students and what the students need," he said. "Of course we can't make the grade for the students--that's something they've got to do."

selected from the admissions office, student affairs office and the academic office in which the student is enrolled.

"One central theme among suspended and probationary students is difficulty with class attendance," Allison said. "Not attending classes penalizes more than anything else."

"We tried to pin the students down at the committee meetings and most admitted they weren't attending class as they should," he said. "We had one young man appealing who said we should tighten up on attendance policies."

Allison said he feels the committee is doing a good job.

"They're fair, interested in the students and what the students need," he said. "Of course we can't make the grade for the students--that's something they've got to do."

David Brodrick's doughnut delights

Fresh doughnuts join morning fare

By PATT ELMORE
Pacer Copy Editor

The newest addition to the UTN breakfast lineup is a doughnut-making machine and its helper Jerry Fleming.

"I'm its mother," Fleming said as he touched the machine fondly. "I wake it up in the morning at five, feed it and bathe it before I leave."

"The entire system is automatic," David Brodrick, head of food services, said. "All you have to do is mix the dough and put it in. The machine does the rest."

"The total cooking process takes about seven seconds," Brodrick said. The batter is mixed and spooned into a wide-topped container with a narrow, doughnut shaping bottom. The machine continually moves above the conveyor belt, somewhat like an X-ray device, dropping two raw doughnuts per conveyor section.

"Yes, it does look something like an X-ray machine," Sally DuFord, dietitian, agreed.

"The kids seem to like them a lot better than bakery doughnuts," Fleming said.

"I used to work in a bakery," freshman David Williams said as he deposited two doughnuts on his breakfast tray. "Being hot like this makes them better."

"Right now, the chocolate seems to be selling better than any of the others," Fleming said. "On the first day, we gave 1400 of them away as an introductory offer. Monday, we sold 32 dozen."

"This is the best job on campus," Fleming said as the machine continued to buzz-click, plipping doughnuts onto the conveyor. "Without a doubt, it's a blast--all except getting up at 5 a.m. so I can go to work at six."

"I'm no doughnut connoisseur," freshman Mark Rose said, "but I like them."

Appreciation Nights cited as fall applications rise

Allison pointed out the admission application increase was no positive indication that fall enrollment would increase.

Elections slated

(Continued From Page One)
University bulletin boards or glass surfaces.

"We discussed a few special places posters could be placed in addition to those two locations," Mitchell said.

"Bulletin board space is so limited that it was agreed candidates could put items on non-painted surfaces as long as they did not form a conglomerate or a safety hazard."

"I have personally taken down some signs that were violating the regulations," Mitchell said. "All the candidates passed the SGA Constitution test on the first try, so I know they know the rules."

There are also no longer any

"We can't say positively this means anything yet," he said.

"Admission applications were up last fall, but enrollment was down."

Provisions for write-in candidates

"The former write-in provisions were ambiguous," Mitchell said. "Their GPA didn't have to be as high and since they had to file their petitions 24 hours in advance, they had their names on the ballots anyway."

"Those wanting to run for office should take the time to file a petition in regular way," she said. "Personally, I think getting rid of the write-ins was good."

"On this year's ballot, a provision for election of a student to the UT Board of Trustees is included. Though three candidates are to be submitted to Gov. Ray Blanton for approval, only two students -- Emmett Edwards and David Gruder Graham -- have filed petitions as candidates."

"I haven't really thought about where the third nominee will come from," Mitchell said. "Maybe Congress or the Chancellor will nominate him. I don't know. I expect it to be a good race, though, and I feel the student vote will carry much weight."

Mitchell also said she expected a "lot better turnout" for the elections than in the past.

"In the past, we've felt lucky if 25 per cent of the students voted," she said. "This year, I figure a 50 per cent turnout would be good. Of course, I hope it goes higher."

Mitchell said there was a good possibility of run-off elections being held next Thursday for the offices of president and secretary of finance. The voting procedure would be the same, with ballot boxes again located in the dorms.

"Somebody has done what they're supposed to do," Mitchell commented of the entire campaign. "I think that a nice clean campaign has contributed to the overall success. There hasn't been any real mud-slinging, and I don't expect any."

Tuition grant bill revived but funding is doubtful

By CHARLOTTE CROWDER
TPCA Correspondent

Nashville-A bill to restore the tuition grant program has cleared the Senate and the House Education committee, but funding for the program next year still seems doubtful.

The Senate voted 30-0 last month to approve the bill, which says tuition grant program funds must be used for secular purposes and accounting procedures to certify secular use must be initiated.

The same bill was recommended for passage by the House Education committee.

It now goes to the House Calendar and Rules committee, where it will be assigned a time for debate on the floor of the House. If it passes the House floor, it will go to the Governor.

The grant program has been ruled unconstitutional by a federal district court and is awaiting appeal to the United States Supreme Court.

Earlier this year, the Supreme Court said the program can continue during the appeal, which might take more than a year. However, since the case was on appeal while the Blanton administration was preparing its budget, funds for the program were not included. As yet, there are no provisions to fund the program.

During the House Education committee meeting, Rep. John Bragg (D-Murfreesboro), who chairs the Finance, Ways and Means committee, told the committee he thought it was irresponsible for them to "hold out false hope" to students by passing this bill without any means of funding the program.

He tried several motions, including referring the bill to his committee, holding a public hearing and waiting until the Supreme Court has made a final ruling on the

case, but all his motions were tabled.

Rep. Fred Atchley (R-Sevierville) said he had been in the legislature a long time, and had found "you can always come up with money."

He then moved to table one of Gragg's motions.

This year, however, the \$5 million needed for the tuition grant program might be hard to find.

The Governor has told the legislature not to add anything to the budget without taking out the same amount. Some legislators said this would mean cutting another \$5 million from an already tight higher education budget or finding the \$5 million in new taxes.

Rep. Tommy Burnett (D-Jamestown), sponsor of the bill in the House, assured the committee all his bill did was bring the tuition grant program in compliance with

the federal court ruling so it would be constitutional when funds are available.

Sen. William Baird (D-Lebanon) sponsored the bill in the Senate.

Biology test slated Saturday morning

By RHONDA WELCH
Pacer Staff Writer

A test designed to measure the undergraduate program in biology in relation to established national norms will be given at 8:30 Saturday morning in the Humanities Auditorium.

"The department is sponsoring the Educational Testing Service Area Test in Biology to provide our faculty some indication of how our program ranks in comparison to other universities in the nation," said Dr. Ted James, chairman of the biology department.

Those juniors and seniors majoring in biology, zoology, pre-professional programs or secondary education are asked to participate in the testing, James said.

"Participation in the Biology Area Test will provide excellent practical experience on nationally recognized achievement tests," James said.

There is no cost for taking the test.

Happy House Day Care offers variety of activities

By ERMA SEATON
Pacer Staff Writer

get a lot of service in volunteer help.

The School of Home Economics conducted a survey of what preschoolers like to eat and has made up three cycles of menus which are nutritious but inexpensive. Burdette said Some sociology students did a survey of how many students needed a day care center. Some physical education people are planning to make play equipment for the backyard. Child development classes observe the regular juice and cookies play-in-the-yard activities.

Margaret Burdette, Happy House director says the program may look busy, but points out nothing is forced on the children.

"We do what interests them. If it's not fun we don't do it. But it's better planning to do more than enough to do rather than be caught short."

"Also, if we let them play all day they would be wild," she continued. "These children are highly intelligent and they need this to stimulate them. They're learning and they love it."

"Most of the children have parents one or both of whom are students at UTM. The rest are children of faculty, administrators and various townspeople. There is a sliding fee scale based on the parents' weekly incomes, going as low as five dollars for a \$10 to \$15 income."

Some women do volunteer work, such as cleaning up, in return for the child's enrollment. Burdette said. No child is turned away because of a parent's lack of money, although priority is given to the children of student and staff mothers.

The idea for Happy House came from Billie Ann Pace, director of women's activities, Burdette said.

"I had started a nursery school in my home for high I.Q. children and I had several of the professors' children and Mrs. Pace brought hers," Burdette said. The center stays open every day but New Year's Day and Christmas Day. This is a great help to students and working mothers, she said.

"Just knowing there's a place open every day the University is open, makes a great difference in their security."

Happy House, which is non-profit, is not really under the University, receiving no money from it - "but we do

tender loving care, Burdette said. Positive rather than negative statements get a better atmosphere. The children are happier because someone isn't always saying "don't."

"We feel that's important because their parents are gone all day," Burdette said. Happy House does one last service for child and parents which is greatly appreciated

Love is also given, the children being touched, held and rocked when they want it.

"We use phrases like 'Keep your hands to yourself' or 'Use your inside voice' rather than 'Don't hit Jimmy' or 'Shut up.' And you'll find that our children rarely ever fight," she said.

"I almost forgot the most important thing," Burdette laughed. "We toilet train them!"

University to administer Freshman Studies in Fall

Last year's successful Freshman Studies Program will be repeated Fall Quarter 1975 with some modifications, according to Dr Phillip Watkins, vice chancellor for undergraduate life.

One modification, Watkins said, would be the dates the program is held.

"We'll register for fall classes on the Monday after Labor Day," Watkins said. "Freshman studies will begin on the prior Wednesday and extend through the weekend, possibly through Monday."

Watkins also voiced plans to continue the program past the

one week session. This will allow a follow up on techniques learned for effective study and career opportunities.

"Many freshmen went through the how-to-study effectively course last year and still had problems adjusting to the pace of college life," he said. "The continuation of the course through Fall Quarter would hopefully alleviate these problems."

"We need sessions like, 'Now you've had your first hour exam. Did the study techniques help?'" Watkins said. "And with the career tests we give, often we get so jammed up during that one week. This will give us an opportunity to discuss and evaluate the career forms with students."

Martha Williams, chairman of the registration committee, said a proposal which would alter the Freshman Studies registration procedures had come out of the committee's Winter Quarter meetings.

"During the Freshman Studies the beginning Freshmen students would be advised and pay their fees," Williams said. "They would pick up their class card alphabetically on the normal days of registration."

Last year a record 835 freshmen participated in the pre-Fall Quarter program, 350 more than in any previous year, Watkins said. This

amounted to 85 per cent of the freshmen and Watkins said he expects a larger percentage of take part in the program this year.

"From a subjective standpoint, the program was very successful last year," Watkins said. "Some students have reported we meant the difference in their staying or not staying in college."

"Many faculty and administrators are concerned with the high attrition rate during the freshman year," Watkins said. "This type of program could be one step toward alleviating this problem."

Local talent to perform at concert

Local talent will be featured tonight at 7:30 in the second night of concerts sponsored by the Intervarsity Christian Fellowship, according to club spokesman Mike Norwood.

The concert will be held outside between the University Center and Ellington Hall if weather permits and in the Ballroom if it is too cold or wet. Last night's concert featured 60's rock singer Shad Williams and was held in the Ballroom.

Final 'Push' figures released by APhiO

By FRED MAXWELL
Pacer Staff Writer

Final figures for Alpha Phi Omega's Push for St Jude" show a net gain of \$27,245.89 for the Memphis children's hospital.

A fraternity spokesman said the figure was well in advance of the original goal for this year \$18,000. The students have raised more than \$90,000 for the hospital through five years of wheelbarrow-push fund raising drives.

"The people along the route were great," Lee Miller, co-chairman for the Push said. The Push ended at St. Jude

on Good Friday after students had walked for seven days from the UTM campus. The 40 students who participated in the march traveled two separate routes to Memphis and covered a total of about 260 miles.

"If anyone wants to contribute anybody we missed should see me or send the money in care of GH Hall or the fraternity," Miller said.

St. Jude's Childrens Research Hospital is the largest childhood cancer research center in the world and is largely supported by private contributions.

Venezuelan official plans UTM visit

Venezuelan Cultural Attaché Gonzalo Palacios will be at UTM May 9 and Venezuelan Ambassador Miguel Burrelli may also be present for the final day of International Week which will extend from May 4-9.

"The Cultural Attaché will be here for the last day of International Week and will also give the Phi Kappa Phi address on the evening of May 9," Milton Simmons, dean of liberal arts, said. "We don't know that the Ambassador will be here but we are hoping he can attend."

Simmons said Burrelli's attendance depended on his schedule.

Burrelli, if he is able to attend, and Palacios would be

here for Venezuelan Day of International Week, Maria Malone, International Week coordinator, said.

"The Venezuelan students will probably be doing some entertaining, too," Malone said.

Other projects planned for the week include full length films, continuous slide projections on foreign countries, language buttons for students and teachers, exhibits, a music night, a high school day and a foreign women's panel discussion.

"We will have a panel made up of foreign women discussing the role of women in the foreign countries," Malone said.

Dr. John Eisterhold will speak May 6 on his student tours to the Caribbean. Malone said. A luncheon similar to a French outdoor cafe will follow.

"The idea for a grievance committee originated in the Academic Senate Agenda Committee last October," Hamner said.

"In January, Dr. Copeland, (chairman of the Academic Senate), appointed a committee to see if such a committee was desirable and to

UTM to host Gamecocks

Saturday afternoon the Pacer Baseball Team will be trying to boost their 13-8 record when they host Gulf South Conference foe Jacksonville State in a doubleheader.

Jacksonville is presently leading the conference. UTM

travelled to Jacksonville to open their season and the Gamecocks handed the Pacers two losses 5-0 and 4-2.

"Jacksonville has a good ballclub—they have strong pitching," Coach Dick Windbiger said.

Monday, Southeast Missouri handed the Pacers back-to-back losses 8-7 and 9-4.

Mack Moore had three hits and three RBI's for the Pacers in the nightcap. Dale Horn belted a solo homerun, his fourth of the season.

"Nobody has given up and we'll come back," Windbiger said yesterday when it was announced the game with North Alabama was rained out.

"We have been in a tailspin in the last couple of games, but everybody is trying hard and we have to start playing better."

Saturday UTM lost a doubleheader to GSC opponent Livingston. In the opener the Pacers fell 7-6 and in the nightcap 6-4.

Robert Davis struck-out 17 as the Pacers defeated Lane College 3-2 on Friday.

In other action since the beginning of the quarter the Pacers swept a double header from LeMoine-Owen, 4-3 and 7-4, last Thursday.

Senior thirdbaseman Mark Stafford paced the attack in the opener with two singles and a pair of runs batted in. Junior leftfielder Walter Glass knocked a double and triple in the second game.

"We played well the second day of the tournament, but were still not playing to our potential," Page said.

On the second day, the Pacers improved their first day 311 overall score to 298.

"Our kids are just now getting the opportunity to sharpen their games," Page said, "but now that warm weather is here, I'm looking for a notable improvement."

During spring break, the Pacers tied for third in the small division category and seventh overall at the Galveston Island Invitational in Galveston, Tex. The Pacers were defending champions at the tournament.

UTM was led by Rockhold who scored 303 in 72 holes. Gary Rozek and Jesse McNeil followed with 306 and 309, respectively.

The Pacers look forward to the Gulf South Conference Tournament following the Tennessee Intercollegiate as their record now stands at 1-2 in dual meets with third and fifth place finishes in tournaments.

Mississippi College and Southeast Louisiana each placed two players on the squad while Troy State, North

The Pacers were forced to come from behind to take the first game of a doubleheader with Wisconsin-LaCrosse last Wednesday, by a score of 7-3. In the nightcap the Pacers took a 6-1 decision.

Walter Glass cracked a two-run homer for the Pacers in the first game and Mark Stafford and Bobby King each collected two RBI's. Senior southpaw Jim Moloney held the Indians to four hits and struck out five to grab the decision.

Freshman pitcher Danny Mitchell was a one-man show in the nightcap yielding only three hits and ripping two bomeruns and collecting three RBI's. Glass was three for four at the plate to take the hitting honors. He also stole two bases including a theft at the plate in the sixth inning.

The Pacers also captured a 15-4 win over Bethel College on April 1.

Monday the Pacers will travel to Union.

Golfers head for Sewanee after finishing fifth at Tech

By Ricky Norton
Pacer Sports Writer

The defending champion Pacer Golf Team will travel to Sewanee April 17-19 to participate in the Tennessee Intercollegiate Tournament which features most of the state's major and minor colleges.

"We've dominated this tournament for the last three or four years," Coach Grover Page said, "but this year we'll have stiff competition in GBC

Last Thursday and Friday,

of Memphis, UT-Chattanooga and Carson-Newman."

UTM has won three first place finishes in the past four years.

"Even with the coming on of many of the other schools, we're still optimistic," Page said. "We have as good a chance as any of the others in our division. Actually, though, we can even match talent with teams such as Memphis State and UT-Knoxville."

On the second day, the Pacers improved their first day 311 overall score to 298.

"Our kids are just now getting the opportunity to sharpen their games," Page said, "but now that warm weather is here, I'm looking for a notable improvement."

Campus construction projects moving smoothly after delays

By CATHY HAMLIN
Pacer Staff Writer

Construction on three major campus projects, delayed by bad weather and material problems, is progressing smoothly following the recent reception of many needed materials, according to Jack Mays, vice-chancellor for administration and development.

The Home Economics-Education-Nursing construction, which has been held up because of a shortage of glass, has received the materials and should be ready by mid-summer. Mays said Browning Hall, currently being renovated for the School of

Business, should be ready by Fall Quarter.

The new baseball diamond has now been completed. Several baseball games have already been played on the new field.

"This is the first of several new recreation areas in the new athletic complex," Mays said. "We had a few hold-ups, mainly due to weather, but we made the deadline."

When weather permits, a ground parking lot near the baseball field will be constructed. The parking lot will serve about one hundred cars.

The eighteen new tennis courts which were previously anticipated to be ready spring

will be delayed, Mays said. "We can't get down the asphalt on the tennis courts until the temperature gets right," Mays said. "You have to wait until warm weather and that means the tennis courts should be installed by late April or early May."

At present, six of the eighteen courts will be lighted, but there is a possibility that all will be lighted eventually, Mays said.

Despite the delayed advancement of the Physical Education-Convocation Center, it is scheduled to be completed by 1976.

The eighteen new tennis courts which were previously anticipated to be ready spring

"We'll be getting real anxious for that in '76," Mays said. This is going to be a two-phase thing. Remodeling will change the present building and then the construction of the new facilities."

In addition to the baseball field and tennis courts there will be six multi-purpose fields. One of these fields will be lighted. There will also be three outside wall handball courts.

"We'll also be laying out a track but are not completing a surface track because of lack of funds," Mays said. "We felt it was better to plan it now."

Inside the center, there will be one large multi-purpose area marked off for several sports activities. There will also be a large dance studio. Seven hand-ball courts are also included, one backed by glass so it can be used for observation.

"The Olympic-sized pool hasn't been started yet, but this pool will have a year-round use," Mays said. "It's unique."

The pool contains underwater lighting and underwater observation areas. It also has an underwater speaker system for improved instruction.

A space will also be included for wrestling, adaptive exercising and gymnastics. Varied dressing rooms will be added along with the usual offices. The weightlifting room will be open 24 hours and is virtually vandal proof.

"If you want to go lift weights at three in the morning go ahead, it'll be open."

Mays said.

"People complain they don't have anything to do," Mays continued. "We're not going to remedy, but help. Anybody with any energy will have something to do."

"This is a multi-purpose facility. It is basic for physical education but these facilities can be used for recreation," Mays said. "The center's main purpose is for physical education and instruction, recreation and athletics. In other words a facility for people."

By DEBRA BLAKELY
Pacer Staff Writer

Dr. Barry Commoner, internationally known biologist and environmentalist, will speak about "Three Crises: Energy, Environment, and the Ecology" at 7:30 tonight in the Humanities Auditorium.

"He will be one of the best speakers we have had through the grant program," said Dr. John Eisterhold, chairman of the Speakers Committee.

Commoner is the director of the Center for the Biology of Natural Systems at Washington University in St. Louis, Mo. He taught at Queens College, Harvard and Washington University, where he was appointed to his present position in 1965. A former physiologist for the U.S. Navy, Commoner was the Naval Liaison Officer to the U.S. Senate Committee on Military Affairs after World War II.

Commoner holds a Bachelor of Arts and Master of Arts degree from Columbia University and a Ph.D. from Harvard. A Phi Beta Kappa, he has been awarded honorary degrees from seven American colleges and universities.

His book, "The Closing Circle," won the Phi Beta Kappa Award and the International Prize for Safeguarding the Environment.

The award is made possible by continuing contributions to a fund established in memory of Mooney, who until his death in the spring of 1971 taught poetry and creative writing at UTM and edited the "Tennessee Poetry Journal," which he founded. Spears said.

ment from the City of Cervia, Italy.

"We feel very fortunate to get a man of his stature, who is both nationally and internationally known," Eisterhold said.

Presently Dr. Commoner serves on the editorial advisory boards of "The Journal of Human Ecology" and "Chemosphere." He has served as consultant to the Rachel Carson Trust Fund for the Environment, the National Tuberculosis Association and the Commission on Air Conservation.

Commoner is also distinguished for past publication and research into such areas as investigations of cellular metabolism, the chemical basis of inheritance.
